WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 72 x 54 mm from 3 mm clear polycarbonate; keep the film on both faces until it is bonded.

Score and snap, or saw with a fine blade; file and polish the edges.

Break the corners 1 mm so the gasket tape does not lift.

Lay 4 mm wide closed-cell adhesive gasket tape round the underside, on the edge, in one length with a butt joint at the back.

Fit: bonded on top of the lid, centred over the 62 x 46 mm opening, overlapping it 5 mm at the ends and 4 mm at the sides.

The hood's tabs and screws sit just outside its ends, 0.75 mm clear.

Check: no gap in the gasket all round; the display reads through it.
