WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Print in light grey PETG, 0.2 mm layers, 4 walls, 30 % infill,
roof lip down on the bed so the walls need no supports.
Outside 92 x 64 x 18 mm: two side walls and a back wall 2 mm thick,
a roof lip 20 mm deep along the back; open at the front (user side).
Four tabs inside the side walls, 7.5 x 10 x 3 mm, flush with the
bottom edge, centred 21.5 mm each side of the hood's middle.
Tab holes 3.4 mm: 79 mm apart across, 43 mm apart front to back;
7 mm screwdriver holes through the roof lip over the two back tabs.
Fit: four M3 x 20 screws with sealing washers pass through the tabs,
the lid and the spacers and also hold the display board.
Check: the hood's top is level with the isolator knob top, 98 mm up.
